

A woman with long brown hair, wearing a brown cowboy hat, a white button-down shirt tied at the waist, and blue jeans with a tear at the knee, is leaning against a stack of wheels. She is looking directly at the camera. The background is dark blue with a subtle pattern.

Safer. Lighter. Tougher

Introducing a Technologically Advanced Wheel that will revolutionize the auto industry. A wheel that is proven to be Safer, Lighter, Tougher, and more cost competitive than the current wheels in the market–

MJR Fly Wheels.

Fly Wheels is a result of a scientific research and development program by the Eric Project Team based in Ontario- California, USA. The 6th generation invention has many enhanced features that will significantly increase driving performance, Applying a scientific design methodology. Fly Wheels' "Flow –down Stabilizer" technology increases the width of the wheel at higher speed thus making it more fuller, stable and Safer for driving. By using the best composite metal – A356 H2 aluminium and a secret manufacturing formulae, Fly Wheels is 30% Lighter than the normal cast wheel on the road, giving you more fuel saving and increased speed. The combination of the special design methodology and advance composite metal make Fly Wheels a much tougher wheel. Fly Wheels lasts longer and saves you more money.

Our Mission– We believe in providing our Customers the Best products at the Best price. (See our price list.)

MJR Design-Craft Team has come out with 3 exciting Fly models- Series MF-01; Series MF-02; and Series MF03 to suit your personal needs. All Fly Wheels have undergone a rigid quality manufacturing TUV and JWL testing standards.

MJR Fly Wheels > Safer + Lighter + Tougher = Great Value + Savings!
It is truly a remarkable wheel– A Revolution in the making!

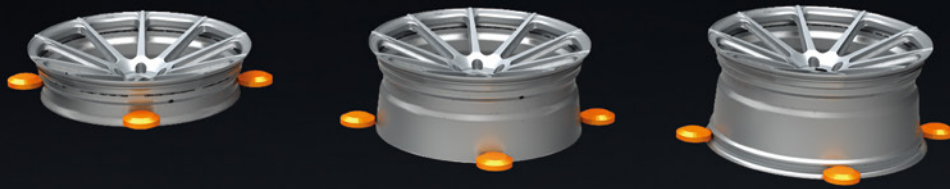

MF 01-02-03 series

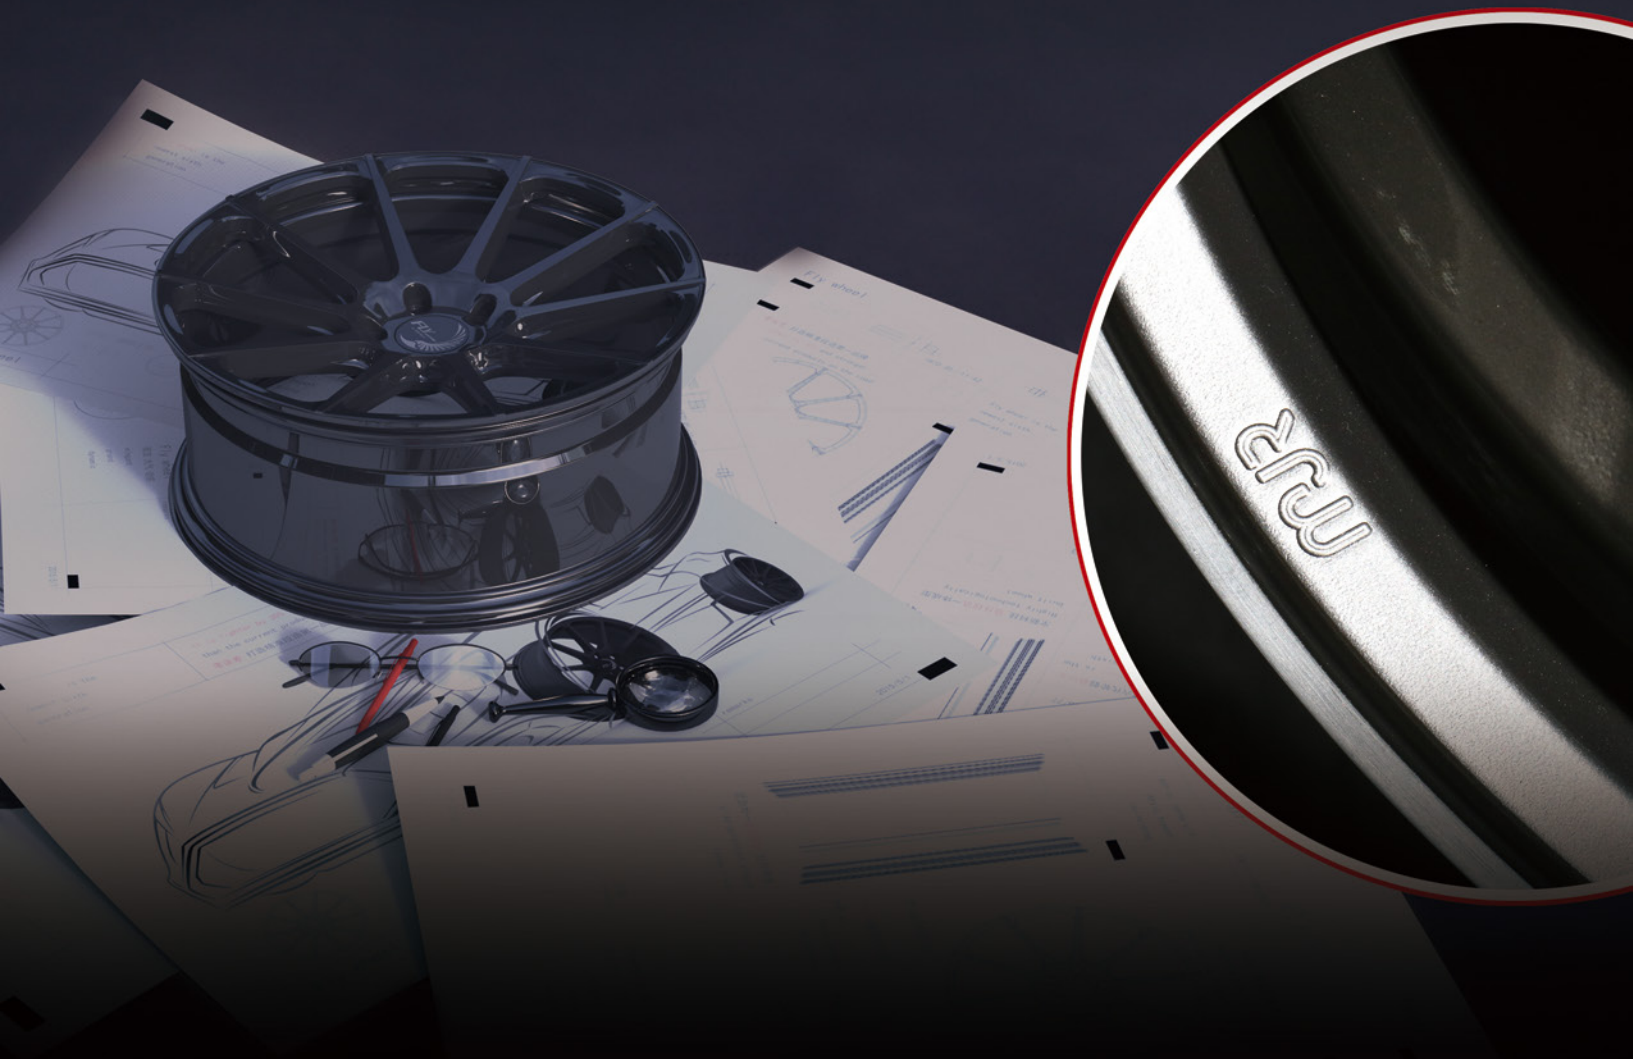

Introducing a Technologically Advanced Wheel that will revolutionize the auto industry. A wheel that is proven to be Safer, Lighter, Tougher, and more cost competitive than the current wheels in the market-

MJR Fly Wheels.

MJR Dynamic Flow Design Technology – “Flow-down Stabilizer”
creates a full rim width effect which makes the wheel more stable at
higher speed. The result is a safer and more smoother drive.
